1. Introduction to Virtual Desktop
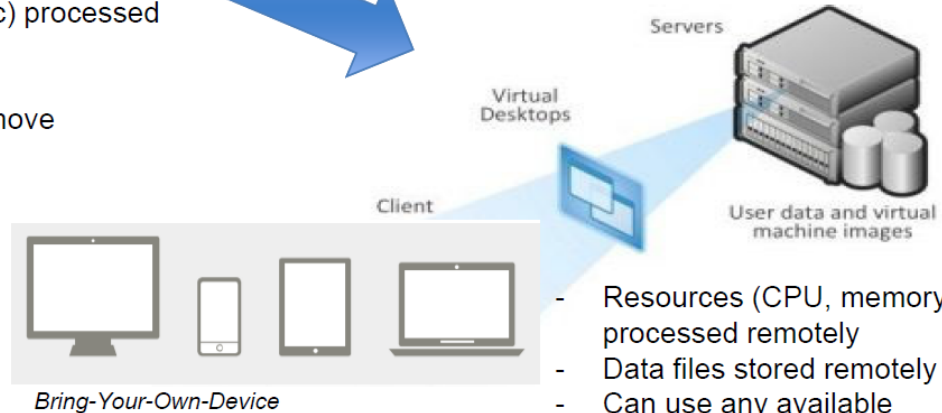

Current

"….a shadow copy of the desktop, ie with Windows and office applications installed, stored and executed entirely from a remote server. It function like a cloud concept, where nothing is been stored locally…."

- Resources (CPU, memory etc) processed locally
- Data files stored locally
- Need to carry device on the move

Workspace Setup

Servers

Virtual Desktops

Client

User data and virtual machine images

Bring-Your-Own-Device

- Resources (CPU, memory etc) processed remotely
- Data files stored remotely
- Can use any available equipment

A UNIFIED DESKTOP: Change the Way We Work
ONE LOGON | ONE EXPERIENCE | ANY DEVICE

1. It provides a <u>consistent desktop</u> for users to work from anywhere with the <u>same experience</u>.

   ▶ "You can pick up where you left off."

   ▶ "NUS IT can FIX things for you without needing access to your laptop."

   ▶ "You can access your work environment from anywhere using any device."

   ▶ "Things always run the same speed, even when you're at home or on an old computer."

2. Key Features

   ▶ **Secure and always up-to-date desktop**.

   ▶ **Consistent Desktop, Same Experience**.

   ▶ **Build Once, Deploy Many**. Custom OS images can be created for different purposes.

3. What is Virtual Desktop?

A UNIFIED DESKTOP: Change the Way We Work
ONE LOGON | ONE EXPERIENCE | ANY DEVICE

3. What I need to do to try Virtual Desktop?

   ▸ **Modes of access**.
      ▸ Using Thin-Client.
   ▸ Using a browser via Workspace ONE (explained on later slide).

   ▸ **Assess suitability**. Only use Virtual Desktop where it makes sense!
      ▸ Virtual Desktop is a standard setup that only comes with VDI Standard Productivity Software[Note1] for work.
      ▸ Users will not be able to install own software or non-standard peripherals.

   ▸ **Have a free consult** with us at nusitdigitalworkspace@nus.edu.sg

4. Standard Software List

▸ Adobe CC

▸ Java Runtime and .Net

▸ Microsoft IE, Edge, Google Chrome and Firefox browsers

▸ Microsoft Visio

▸ nBox

▸ Office Professional Plus 2016

▸ OpenText Enterprise Connect Framework

▸ Oracle RightNow

▸ SAP GUI

▸ Skype for Business

▸ Winzip

THANK YOU
