

From Home PC (macOS Catalina) to Office PC (macOS Catalina)

Remote Desktop Connection

Setup Guide

Apple Remote Desktop is a macOS feature that allows you to connect to your Office PC from home. You will be able to access your Office PC as though you are sitting in front of it. Hence, this method is suitable for you if you have work data or software installed on your Office PC that you need to use.

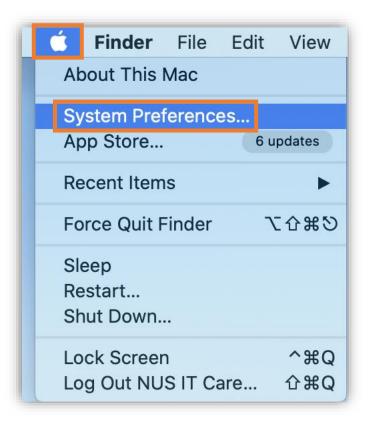

This document describes two steps that you need to do:

- 1. Set up Office PC for Remote Desktop Access (one-time setup)
- 2. Connect from Home PC to Office PC

Do note that this document is based on macOS Catalina and Windows 10 so the user interface will differ for other macOS and Windows OS version.

Setup Office PC for Remote Desktop Access (one-time setup)

1. Click Apple menu **G** and select System Preferences.

From Home PC (macOS Catalina) to Office PC (macOS Catalina) Remote Desktop Connection Setup Guide

2. Click on Sharing.

Select the Remote Management checkbox.
 Select 'Only these users' and click the + button to add users.

Connect from Home PC to Office PC

- 1. Before connecting to your Office PC remotely, ensure the following pre-requisites are met:
 - a. Your Home PC is connected to NUS network through VPN connection.
 - If you do not have Pulse Secure installed, download the installer <u>here</u>. Follow the guide <u>here</u> to setup a new connection.
 - b. Your Office PC is turned on
- 2. Look for the **Finder** menu bar. Click on **Go** and select **Connect to Server**.
